

XOXO Integration

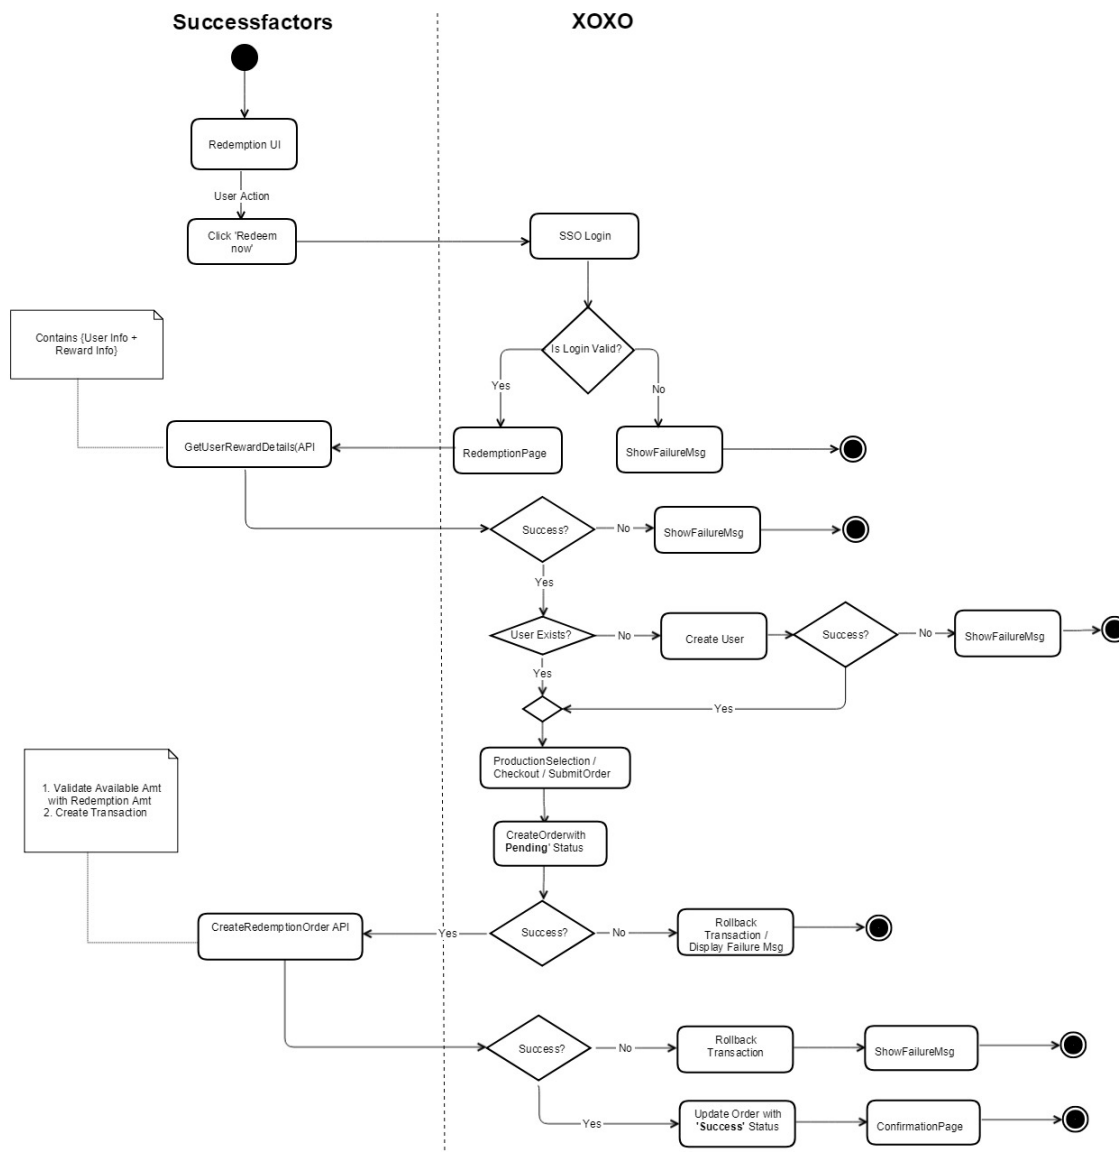

Activation

1. Customers activate through XOXO (no activation on SF end).
2. What is an activation key & static special key? Does SF need to store it?

SSO

SSO through username instead of email (as we use username for web login).

Redemption flow

Global Floating Balance

1. How / where does it gets managed?
2. During Redemption, who should validate the balance - XOXO or SF?

API Details

GetUserSpotAwardDetails API

1. Input
 1. UserId
2. Output
 1. User Info (*person id, user id, first name, last name, email, phone, location*) – For XOXO to insert user information during redemption.
 2. Total Reward Amount – To display it on XOXO UI (not necessary to store on their end).

SpotAwardRedemption API

1. XOXO Transaction Id
2. User Id
3. List<OrderDetail>
 1. Order Type
 2. Order Description
 3. Order Amount
 4. Any other details?
4. Audit fields (created by, created date, last modified by, last modified date)

API Protocol / Prerequisites

1. OAuth-2 protocol
 1. company id (*available upon successful SSO*)
 2. user id (*available upon successful SSO*)
 3. secret key (*shared by SF*)

Reporting

Users navigate to XOXO for Detail Award History.
